

# GET THE SCOOP!

**Avoid the “Second Shovel”** Make snow collection pockets. Clear an area next to your driveway and near the road for the snow pushed by the plow. This gives snow somewhere to go when moved by plow trucks.

## How to Prevent the “Second Shovel”!

### TIPS:

Shovel in the same direction as traffic.  
*Watch the weather!*  
*Keep in mind melting, water-logged snow can be heavy.*

### Why do I get a snow berm?

The primary goal of plowing is to remove snow from the streets so

that the road is open to vehicular traffic. Plows typically push snow to the right of the travel lane and the driver cannot stop or raise the plow at each driveway as this would leave a pile of snow in the roadway. Residents are advised to wait until the plow has been through their road prior to cleaning their driveway.

### Whose snow is it anyway?

CBJ would like to remind residents that shoveling, blowing or plowing snow into the roadway is against CBJ code.

**72.24.075— Placing snow in public ways prohibited.** (a.) No person may place or cause to be placed any snow or ice on any sidewalk, street, roadway, parking place, or other public place so as to impede or render unsafe vehicle or pedestrian use.
