1.0 GENERAL INFORMATION

This Class 3 Request for Proposal (RFP) defines the scope of the project, explains the procedures for selecting a firm, or firms, to provide the requested services and defines the documents required to respond to the RFP.

1.1 Purpose

The purpose of this document is to solicit proposals from qualified Consultants to provide material source surveying and mapping services. The CBJ intends to enter into a contract with one surveying consulting firm. The Consultant must have at least one staff member who is a State of Alaska licensed land surveyor.

Services performed under this Contract shall be limited to individual projects not exceeding $50,000.00 in fees.

1.2 Scope of Services

The CBJ owns and operates several rock quarries and gravel pits in Juneau. Active rock quarry operations are currently underway at Stabler Point Quarry in Auke Bay and surface gravel mining operations are underway at two CBJ gravel pits in the Lemon Creek Valley: the CBJ Lemon Creek Gravel Pit and the North Lemon Creek Material Source. Other material sources may be developed or reactivated during the term of this contract. Services to be performed under this term contract may occur at any of these mining locations or at other CBJ material sources that may be identified in the future.

Services shall include, but are not limited to periodic resurveys and remapping to document the changes in topography due to mining activities. In the past, this has occurred on a semiannual basis at Stabler Point Quarry, and at less frequent intervals at other locations, depending on the rate of extraction. Services may also include layout work to assist in development of new material sources, including locating property lines and setting monuments, stockpile measurements and volume computations, and any other survey related tasks required by the CBJ Material Source manager.

Resurvey data shall be combined with existing past data (traditional survey data and LIDAR data) to produce updated topographic maps. The maps produced must be available in AutoCAD drawing format, including a TIN layer consisting of 3D faces, and a break line layer. The files shall be saved as AutoCAD 2014. The files shall be saved in a manner such that a hard copy can be plotted immediately when the file is opened in AutoCAD without executing any intermediate commands. The Consultant shall be responsible for ensuring that the links to all blocks and external references (if used) function properly when the files are opened. All plot configuration files shall be included to produce an exact replica of the submitted hardcopies.

1.3 Contract Term

CBJ intends to enter into a contract with one surveying consulting firm for a three-year term, starting upon execution of the contract and ending on December 31, 2022, with the option of renewing the contract annually, for two additional years. (Five years total)
The City and Borough of Juneau (CBJ) does not guarantee that any projects will be assigned under this contract or any minimum contract value.

The contract will not be exclusive; the CBJ may contract with any other party for similar or related services.

Each project to be performed under the term contract will be executed by a written amendment stating the specific scope of services, specific method of payment, performance period and any other conditions pertinent to the particular project.
