Welcome to the Juneau International Airport!

Beginning March 25, 2020 at 12:01am, the State of Alaska requires all out-of-state travelers to quarantine for 14 days after arrival.

All travelers should follow previous guidance including keeping 6 feet apart from others, regular hand washing, cleaning surfaces, and avoiding large gatherings.

SIGNS & SYMPTOMS

Patients with COVID-19 have experienced a wide variety of symptoms with mild to severe respiratory illness. Contact your healthcare provider if you experience:

COUGH
SHORTNESS OF BREATH
DIFFICULTY BREATHING

Or two or more of the following:

- Chills
- Diarrhea
- Fatigue
- Fever
- Headache
- Rigors
- Nausea
- Joint/Muscle aches
- Sputum production
- Diminished sense of smell and taste

These symptoms may appear 2-14 days after exposure. If you seek medical care for other reasons, such as dialysis, call ahead to inform your doctor about your recent travel.

SCREENING HOTLINE

If you do not have a primary healthcare provider, Juneau residents can call the new Capital City Fire/Rescue COVID-19 screening hotline:

586-6000
NOON - 6:00PM

A healthcare worker will help you complete the screening survey. If you qualify for testing, you will be contacted to arrange an appointment at the CCFR drive-thru testing center at the Hagevig Fire Training Center.

Due to limited supplies, testing is currently only available for individuals meeting strict criteria. At this time, we are not able to accommodate patients who arrive at the testing center without referrals from their primary care providers or the screening hotline. Testing is by appointment only.

Have a non-clinical question about COVID-19? Call 2-1-1. Alaska 211 can help the public with questions about COVID-19 and refer callers to appropriate resources. For Alaskans who live in areas where 2-1-1 cannot be accessed, call 800-478-2221.
